Originally the "China Girl" frames were created in-house by laboratories to varying standards, but in the mid-1970s engineers from the Eastman Kodak Company developed the Laboratory Aim Density system as a means of simplifying the production of motion picture prints. Under the LAD system, Kodak created many duplicate negatives

frame is a single image of film or video. Framing (a shot) involves composing the visual content of a series of frames as seen from a single point of view, i.e., a fixed camera. In frame is the term used by screenwriters to indicate the entrance of a person or thing into a framed shot.. Background: The “frame” of fine art was adopted by photography
