COMPUTER SYSTEM = HARDWARE + SOFTWARE+ USER • Hardware = Internal Devices + Peripheral Devices All physical parts of the computer (or everything that we can touch) are known as Hardware. • Software = Programs Software gives "intelligence" to the computer. • USER = Person, who operates computer. Hardware. All the physical and tangible components of Computer are called Hardware.

Computer Fundamentals PDF Free Download Parts Software ...

One of the main environmental considerations when creating computer systems is weather to upgrade an existing system or replace it with a new one. Environmental advantages of installing a new system: Power consumption - Modern computers tend to be smaller and more efficient, as well as having better 'sleep' systems so they use far less power when not in use.
