More Than A Skeleton It

Paul L. Maier's More Than a Skeleton (2003) is the sequel to A Skeleton in God's Closet. Unlike the first book that almost exclusively focuses on an archaeological discovery and its implications for the Christian faith, this book deals only cursorily with archaeology while presenting another challenge to fundamental Christian beliefs.

...

The human skeleton is the internal framework of the human body. It is composed of around 270 bones at birth - this total decreases to around 206 bones by adulthood after some bones get fused together. The bone mass in the skeleton reaches maximum density around age 21. The human skeleton can be divided into the axial skeleton and the appendicular skeleton.
