Polkinghorne traces the correlation between the development of quantum theory in physics and the development of Christological thought in theology. He leaves a lot of room for further investigation as to the actual nature of the quantum theory, but he treats the development of the theological implications of Jesus fairly thoroughly.

That may be a legitimate conclusion for quantum theory as it is in theology and even philosophy - silence has a venerable and essential role to play within many spiritual traditions, and Wittgenstein famously concluded his *Tractatus* by suggesting that whereof we cannot speak thereof we must remain silent.

Quantum mechanics has recently indicated that, at the fundamental level, temporal order is not fixed. This phenomenon, termed Indefinite Causal Order, is yet to receive metaphysical or theological engagement. We examine Indefinite Causal Order, particularly as it emerges in a 2018 photonic experiment.
