participant observation. Since doing participant observation means being embedded in the action and context of a social setting, we consider three key elements of a participant observation study: 1. Getting into the location of whatever aspect of the human experience you wish to study. This means going to where the action is—people's ...

Participant observation is a traditional ethnographic method in which the researcher joins a group and participates in their activities. The researcher observes and interacts with group members while performing the same activities. For example, a researcher might become a call-center operator for a few days, with the goal of better ...

The first paper builds on micropolar continuum elasticity theory (31-33). In this context, chirality based on broken centrosymmetry is a necessary condition for coupling to micro-rotations and hence for obtaining rotons . The second paper suggests achiral and chiral three-dimensional (3D) periodic micro- and macrostructures. Here, the ...

In this paper, we propose a simple but effective image prior-dark channel prior to remove haze from a single input image. The dark channel prior is a kind of statistics of outdoor haze-free images. It is based on a key observation-most local patches in outdoor haze-free images contain some pixels whose intensity is very low in at least one color channel. Using this prior with the haze imaging ...
